***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 4-8, 10-12, and 16 rejected under 35 U.S.C. 102(b) as being anticipated by Hourai et al ('545). Hourai et al teach a fiber reinforced shape memory polyurethane resin and method for production comprising polyisocyanate and polyol (Abstract). In particular, patentees disclose the polyol to consist of polypropylene glycol in an amount up to 85 weight percent, and the reinforcing fibers in an amount up to 40 weight percent (Col 8 lines 6-46, 50-51, col 14 lines 4-5, and 9). Furthermore the polyisocyanate of Hourai et al preferably consists of hexamethylene and isophorone diisocyanate, which are liquid at room temperature, and exist relative to hydroxyl groups by a ratio of 0.9 - 1.1:1 (Col 6 lines 43-45, and col 11 lines 15-16). Hourai et al go on to teach that the final polyurethane can be formed by injecting the resin into a mold followed by heat curing, wherein the composition has a glass transition temperature between 40°C and 130°C (Col 2 lines 20-27, col 6 lines 63-68, and col 17 1-2).
